

Jacqueline Köch Turner 🌿 Interior Art & Artifacts

Jacqueline Köch Turner understands the realities of the interior design business.

She knows that every client has unique tastes. CAD print-outs provide precise perspective but do not capture the mood of a space or tap into the tastes and passions of a client. Turner's renderings highlight the creativity of the designer and remind the client that they will be surrounding themselves with materials, textures, colors and art that are a reflection of them. ☁

Jacqueline Köch Turner understands the impact of original art in an environment.

She is sensitive to the range of sensibilities of different clients. Some adore large-scale murals, while others admire small delicately expressed watercolours. Some clients value art that reflects moments of their lives.

Others appreciate landscapes or details of nature. This enables Turner to work closely with a designer to produce work that clients truly appreciate as their own. 🍷

Jacqueline Köch Turner observes details and translates them into objects of beauty.

Artifacts stand the test of time and can be passed from one generation to the next.

Such objects can take the form of pillows, furniture, clock faces, book ends, serving trays or jewelry boxes. These objects will mean something to their owners and remind them of the marvelous experience they had collaborating with their interior designer over a period of weeks or months. ✨

Contact Jacqueline Köch Turner if you believe that her talent and experience can contribute to the success of your interior design practice:
